- What do I mean by “plug and play?”

https://flic.kr/p/6K9jC4

- Conway’s Law (1967):

Any organization that designs a system (defined broadly) will produce a design whose structure is a copy of the organization's communication structure.

- Microservices

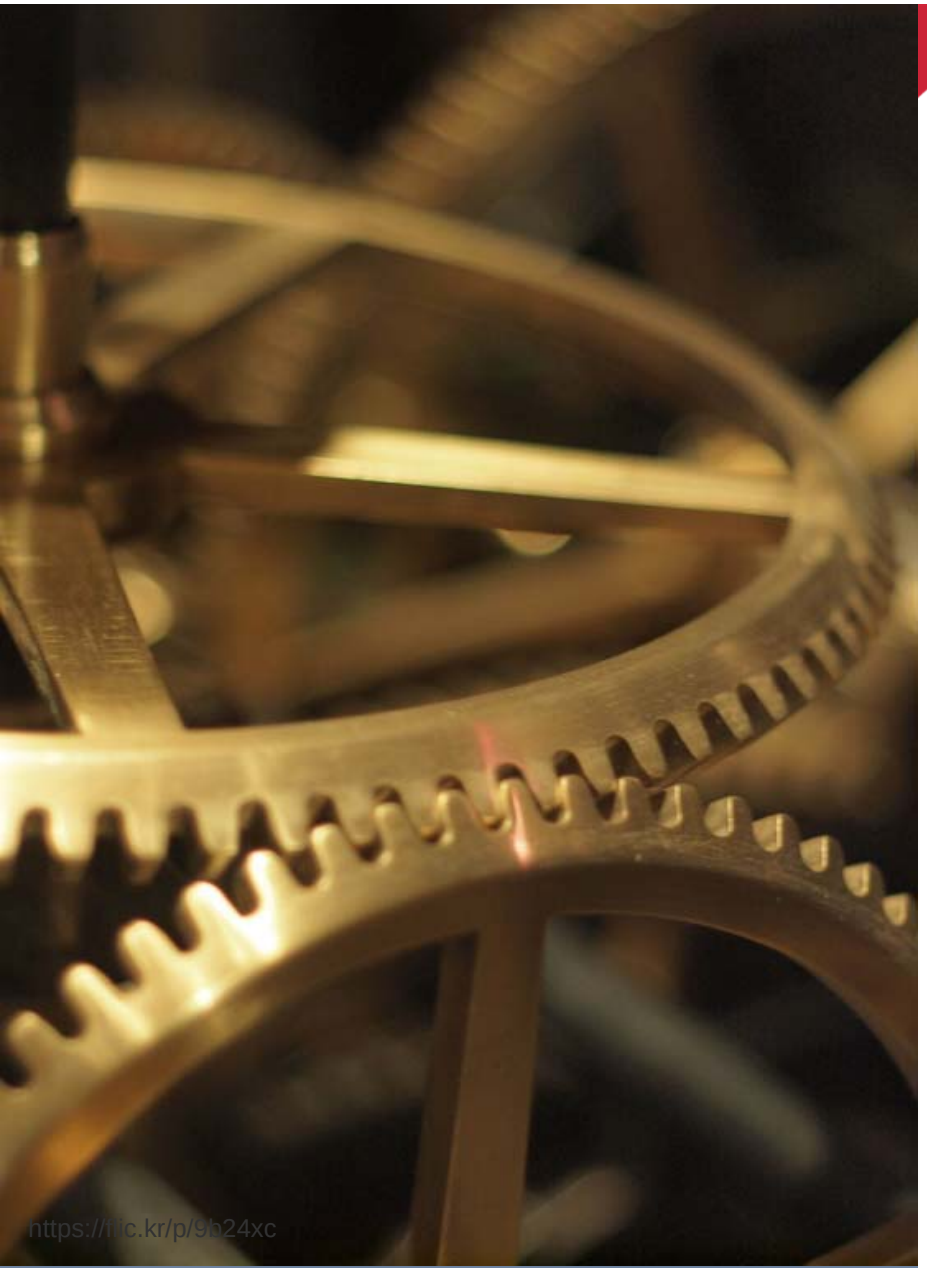

Software services designed to be lightweight, independent, and to service a business goal.

- Composable organisations

Today’s winning organisational design?

Is this plug and play?

- Why not just partner?

To get it right, it’s not just about the fit it’s also about the cadence

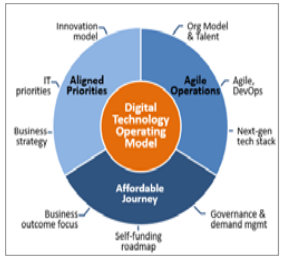

- So what does a plug and play compliant org like look like?
  - Moveable multi-talented teams capable of different operating speeds
  - Range of communication channels and well structured information
  - Atomic business functions with clear interfaces and well defined processes
